Frontend:	React • Next.js • Tailwind CSS • Responsive Web Development
Backend & DB:	Supabase • PostgreSQL • SQL • Authentication • Role-Based Access • API Integration
Development:	Full-Stack Development • Web Applications • CRUD • Debugging • Software Testing • Requirements Analysis
Automation:	Selenium • C#/.NET • Java • Test Automation • Selenium Grid
Tools:	Git • GitHub • Google Workspace • Microsoft Office • Trello • Shopify

PROFESSIONAL EXPERIENCE

IT SYSTEM ANALYST

Local Government of Sorsogon - Contract

Aug 2024 – Present

- Develop, maintain, and improve web-based and database-driven applications supporting organizational operations.
- Analyze business requirements and translate user needs into practical technical solutions.
- Troubleshoot application, software, data, and system issues and implement appropriate fixes.
- Perform software testing, debugging, validation, and quality assurance throughout the application lifecycle.
- Collaborate with end users and technical personnel to resolve issues and improve business workflows.

CO-OWNER / OPERATIONS & IT SUPPORT

The Rig Builders - Self-Employed

Jul 2020 – Present

- Manage business operations, digital systems, applications, and technology-enabled workflows.
- Administer Google Workspace and other business productivity platforms.
- Maintain website and e-commerce operations, including Shopify.
- Implement digital tools and workflow improvements to support operational efficiency.

DEVOPS ENGINEER

Chevron Holdings Inc. (Manila Shared Services Center) - Internship

Dec 2019 – May 2020

- Developed automated testing solutions using C#/.NET and Selenium for enterprise applications.
- Created and maintained automated test scripts; assisted with Selenium Grid Server setup and configuration.
- Supported Java-based automation and testing activities across SAP, Salesforce, and Maximo.

SOFTWARE QUALITY ASSURANCE ENGINEER

Samsung Electronics - Internship

Aug 2019 – Nov 2019

- Developed mobile test automation scripts using Selenium and Java.
- Performed software testing and validation and documented test results and findings.

SELECTED PROJECT

PROCUREMENT MANAGEMENT INFORMATION SYSTEM (PMIS)

Next.js • React • TypeScript • Tailwind CSS • Supabase • PostgreSQL • Git

- Designed and developed a full-stack procurement management application for procurement requests and workflow progression.
- Implemented authentication, user access management, CRUD operations, workflow stages, and stage history/audit tracking.
- Integrated responsive frontend interfaces with Supabase backend services and PostgreSQL database operations.

EDUCATION

Bachelor of Science in Information Technology - Major in Web and Mobile Application

FEU Institute of Technology • March 2020
